Parther Arrest of American Sailors—Six More in Prison— Our Navy on the Const—Wrdched Appearance of the Pri-soners—Kossia—Ingraham—The Sailors and the Captain—

scults of "ganaucia," I am out of the way when there are occurring the most interesting things for my observa-

reports and evidence adduced by Mr. Crawford, the Bri-tish Consul-General at the Havana, and which official re-

ports have never been withdrawn, or explanation given, to negative their effect as advice for the Spanish government.

To their countryman, the acting American Consul, Col. W. H. Robertson, Judge Clayton not having yet arrived, they give statements consistent with truth, and consigning the declarations made by the three railors previously taken, and who are to pass the ordeal of condemn ation, we are informed, to morrow. After several month of restraint by force, they contrived to escape, and through the treachery of the parties who had taken all their money for the service, they are thrown purp sely into the hands of the government.

When the Albany was here, the Captain was urged to ge and look for these men; but the ship, I was informed, 'drive too much water.' How it was with it ship's boats I did not inquire, as they generally do the inskore business. I conclude they were all too deep. The sailors arrived yesterday morning, and they look wretched enough to excite even Spanish sympathy, which would be ship to excite even Spanish sympathy, which would be she the data people. If these men had been rescued by their countrymen they would have been saved much misery, the four y tars of sentence to imprisonment and hard labor that await them, and the government of the United States would have been furnished with testimony where by conviction might have been brought against those who have been guilty of gross offence against their laws.

There is a difference—and it is against them. They were born in the United States | the Hungarian came to the United States, it is said, under couract not to return to Austria or Turkey. This was with his own consent. Under this pledge he went on, Isuppose, to assure himself of the rights of citizenship. That pledge was over him in all he did, for honor and for equity, and when he violated it he destroyed the very basis upon which his rights, ander "intention." derived. When he returned to Emyrea, there fore, he had no right to claim, under the paper he held. It should have been e

## FINANCIAL AND COMMERCIAL.

THURSDAY, Nov. 3-6 P. M. We have nothing new to report in the stock market the amount of business transacted was limited. Nica Bonds, %; Morris Canal, %; Harlem Railroad, %. Erie Railroad declined % per cent; Reading Railroad, %; Michigan Central Railroad, %. The market has very fittle life in it, and what little there is, is fast cozing out. But for the shorts, prices would touch points much lower. The failure of a large operator-H. Dwight, Jr .- in New York Central Railroad stock, and also the Chicago and Mississippi Railroad stock, was reported and confirmed to-day. There was a rumor to this effect a few days since, but it was premature. The fall in New York Central has been too heavy for other speculators. This is not the first failure it has caused, and we apprehend it will not be the last. The Eric Railroad speculators have been making great efforts to get the drafts we alluded to a few days since renewed, but, having failed, must meet them exceedingly. The further negotiation of such drafts as those referred to has been stopped, and the inside exerctors in Eric Railroad stock will be compelled to Chancier in some other way to fill the vacuum caused by the paying up of the outstanding drafts. The failure of the house of Leggett & Brothers was also announced towas large over advances to paper manufacturers. This, with the tight money market, was more than the house

could stand. The failure will prove a bad one.

The earnings of the Srie Railroad Company for October, 1853, amounted to \$552,995 06, against \$376,838 89 for the same month last year, showing an increase of

semi-annual dividend of ten per cent; the National Fire

rance Company, twelve per cent.

The receipts at the office of the Assistant Treasurer of this port to-day, amounted to \$105,080 97; payments, \$451,904 10—balance, \$6,838,519 39 A few weeks since the balance was upwards of ten millions of dollars. The luction is still going on rapidly, and the deposits will oon be brought down to a very moderate amount.

The stocks offered were some of the best in the market The Harlem Railroad is the topic of universal conversation, ridicule and condemnation, by the public and the stockholders, against the mans gement, and the vacillating judgment that is injuriously exercised in altering the rates of fare, and time of starting, &c., and in many other respects, to the injury of the stockholders and the inconvenience of the public generally. It is only about a year ago that the direction deemed it necessary, in its sound and wise discretion-when the through fare to Albany was about two dollars, as i carrying but a few passengers from New York to Albany at that price, by reason of the competition of the Hudson River road— to reduce the fare of the Harlem to one dollar, which was below that of the Hudson River Railroad. In consequence of that measure the Harlem has ever since been doing a large through passenger business, carrying from 200 to 800 passengers in a train, at a dollar each; and within a sew days past this company have advanced the rate of the through fare to Albany to two dollars—the same price as the Hudson road; but for what reason we know not. There can be no good reason for such change, and the effect is seen, as they ought to have known before. In consequence of this advance in the rate of fore. In consequence of this acrey a dozen passengers through to Albany, and are losing money by this change wholesale. They tried this plan long enough after the road was built, to show that they could not compete with the Hudson, at the same rate of fare, and yet they go back to the same fare they abrogated and abolsahed a year ago, and the result is, they do not now take twenty-five dollars' worth of through passengers in a train to Albany, at two dollars. When the fare was one dollar, they had about two hundred to three hundred passengers in a train, which paid well. What was the son for this alteration? It could not be to increase the passengers over the road, nor to increase the amount me of this part of the road, nor to accommodate the public, nor to advance the interests of the stockholders. We can therefore see no reason but a bad one. The sconer the stockholders get rid of such managers the better, and place in the management of the affairs of this company gentlemen who will carry out the desires

and wishes of the stockholders.

The Governor of Massachusetts has ordered the various banks in the commonwealth to render in, agreeably to the provisions of the Revised Statutes, a return of the state of their standing on the first Saturday of Oc tober, at two o'clock. From these returns the facts for annual report will be obtained.

The earnings of the Vermont Central Railroad for the south of September, we stated some days since, would amount to \$50,000. The actual returns, now received, show \$56,062 69; September, 1852, \$64,340 19—gain, \$21,722 50. The months of July, August and September,

show a gain of over 24 per cevat. over the corresponding months of last year. Though 5,000 to 6,000 barrels of flour are carried daily over the road, yet a large amount is accumulating at Ogdenaburg, beyond the imeans of the company to transport it.

In reference to the payment of the last instalment of the bondholders bonn of \$1,000,000, to complete the Illinois and Michigan canal the Illinois Settle Service of the 18th

diction.

This is not so. The trust continues until the "registered bonds"—these held by the subscribers to the \$1,800,000 loan, and registered by the terms of the act—are paid. By the terms of the act creaping trust, the \$1,600,000 loan is to be paid first; next the interest on the "registered bonds," then upon the entire interest. In paying the principal, the "registered bonds are preferred, and when these are paid, principal and interest, the trust ceases.

on the 1st of January last the principal of the entire canal debt was \$4,886,522.83, upon which interest had accumulated, to the same date, amounting to \$2,373,299.23. We have not the figures at hand, but the principal of the "freferred" debt is about \$3,000.000, exclusive of the interest. There can be very little doubt now, that by the time the canal bonds (those that have the longest to run) fall due, the debt will be completely wiped out; and in view of funds yet to be derived from the lands (over \$2,000,000) the "preferred" debt will be paid at a much earlier date, and the canal given up to the State.

The citizens of Milwaukie have voted in favor of loaning the city credit for \$200,000 to the Watertown Railroad. The city has now loaned its credit to the full amount of the city has now loaned its credit to the thir smooth of the limit allowed by a law of the last Legislature of Wisconsin—one million of dollars. Its respective loans are \$224,000 to the Milwaukie and Mississippi road; \$200,000 to the Lake Shore; \$200,000 to the La Crosse; \$200,000 to the Fond du Lac, and \$200,000 to the Watertown road. At the last half yearly meeting of the stockholders of the Rouen and Havre Railroad Company, held at Paris, it

was resported that the receipts for the half year ending Aug. 31, 1853, amounted to \$498, \$60, (2,490,449 francs.) and the expenses to \$347.265, (1,737,339 francs.) being a clear profit of \$150,823, (754,108 francs.) The capital of this company is \$11,658,883, (58,294,918f.)

The net earnings, therefore, amount only to about one and a half per cent on the total capital. We give this for the purpose of showing that in France, where labor of all kinds is very cheap, and railroads are managed with the greatest economy, the operating expenses amount to full seventy per cent of the gross earnings. In this coun-try the railroad companies report an expenditure of only about fifty per cent of the receipts in running expenses. The truth is, there is not a railroad on this side of the Atlantic worked at less than sixty per cent, and most of them go ever that rate.

Total assets..... £1,991,849 £6,727,764 This statement comprises the returns of four banks made for the quarter ending June 30, 1852 and 1853, viz.:-The Bank of Australia, Union Bank of Australia, Victoria Branch of Bank of New South Wales, and the Bank o Victoria. The most striking feature in the above is the large amount on deposit, showing the enormous sum of £5,563 966, for which the banks allow no interest, while they charge for discounting bills not exceeding 90 days six percent, and for a kinger time seven per cent per annum. This state of things arises from the fact of their not being able to employ any portion of their capital, for they can only use a small part, even of their deposits, in ounts; at least such is the case with what are termed the English banks, namely, the Bank of Australia and the Union. The former is considered the leading bank, having

the largest extent of business and a paid up capital of £900,000.

Mines and Mining.

Advices from Lake Superior promise well for many of the best mines. Truman Smith's assertion with regard to the presence of silver in most of the upper veins, has been again verified at the Alb'on mine. We have sees a piece of native copper from their vein (the old Cacique,) attached to which were several little lumps of much purer metal than circulates among us in the shape of half dollars and quarters. Such deposits were found, we believe, at the Cliff when it was first opened, and they have been common enough in other veins. We doubt, owever, whether silver will ever be found in the native

copper from his twenty foot vein, and expects morning the was bought some three or four years ago for fifty dollars.

The operations at the board to-day were limited, but we do not observe any material alteration in price. There appears to be no anxiety to realize on the part of holders, and as it is confidently believed that there is a better time coming for the mining interest generally, the disposition to hold is pretty general. Where sales to any extent are forced, low prices have to be submitted to but the leading stocks are well held, and doubtless will be kept out of the market. The sales to-day were as follows:—
